PoCo FC is looking for 1 volunteer to help support our club technology and Veo video process.

This role is for someone who is organized, comfortable with technology and interested in helping coaches and teams use video and club systems more effectively.

What this role is really about

This is not a heavy technical job or a coaching role. It is about helping the Club keep technology organized, supporting Veo camera use, helping coaches access recordings and making sure the tools we already pay for are being used in a practical and consistent way.

ROLE DETAILS

What the Lead may help with

- Support Veo camera bookings, setup, charging, storage and basic use.
- Help coaches record games, upload footage and access video.
- Support account access, team setup and permissions where approved.
- Help coaches understand clips, highlights, sharing and basic tagging.
- Create simple how-to guides for common technology questions.
- Track equipment issues, accessories, repairs, renewals and subscriptions.

Who this role is best suited for

- Someone who is practical, organized and comfortable with technology.
- Someone who can explain simple steps clearly to coaches and volunteers.
- Someone who enjoys problem-solving and basic troubleshooting.
- Someone who can keep equipment and access details organized.
- Someone who wants to help the Club improve without overcomplicating things.

Helpful experience

This role would be especially well suited for someone with experience in one or more of these areas:

- Basic IT support, software platforms, or account administration.
- Sports video, camera setup, livestreaming, or video sharing.
- Veo, Hudl, YouTube, Google Workspace, TeamSnap, or similar tools.
- Coaching technology, team operations, or equipment coordination.
- Creating simple instructions, checklists, or user guides.

Training, time and support

PoCo FC will provide access to the Club's current Veo tools, equipment process and related technology procedures.

- Review of Veo camera setup and upload process.
- Review of account access, privacy and sharing expectations.
- Review of equipment storage, booking and issue tracking.
- Safe Sport or Respect in Sport training if required by the Club.

Time commitment: as needed, with more activity during the season, tournaments, team setup periods, or when coaches need support.

This is a support role.

The Technology & Veo Lead helps the Club organize and support technology use. The role does not replace the Technical Director, coaches, staff, website administrator, privacy lead, or any formal decision-maker.

Why this role matters

Video and technology can be a huge help to coaches and players, but only if the systems are easy to use and properly organized. This role helps PoCo FC get better value from the tools we already have and gives coaches more support without adding extra pressure to technical staff.
